DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-16, drawn to a method and system for transmitting an immersive video stream, classified in class 725, subclass 116.
 - II. Claims 17-61, drawn to an on-screen directory, classified in class 725, subclass 43.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions I and II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention II has separate utility such as a directory which displays information from several distinct sources, such as a directory which allows a user to view preview information from a satellite source, a CATV source, and a data network source. See MPEP § 806.05(d).
3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.
4. A telephone call was made to Patrick Bever on November 7, 2005 to request an oral election to the above restriction requirement, but did not result in an election being made.

Art Unit: 2611

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
